- 
- 

## EMPLOYMENT HISTORY

Dec 2022 — Present

Principal Engineer.

- **Acted as Product Owner** for SharePoint Online platforms, **owning backlog, user stories, and roadmap** in collaboration with CPO and senior leadership.
- **Bridged business and technical teams** to deliver high-value enhancements, achieving a **30% reduction in support queries** through user-centric self-service and workflow automation.
- Facilitated **sprint planning, reviews, and retrospectives**, driving delivery predictability and improving team velocity.
- Partnered with compliance and audit stakeholders to establish a **governance framework**, ensuring regulatory adherence and enhancing audit readiness.
- Responded to a critical **audit violation incident**, leading cross-functional remediation that protected compliance standing and executive confidence.
- Delivered **10+ consulting engagements** across site architecture, document management, and Power Platform automation, directly enabling efficiency gains for multiple business units.

Dec 2016 — Dec 2022

## SharePoint Platform Lead

- **Transitioned from developer to as de-facto Product Owner for SharePoint Online**, owning the product backlog, defining user stories, and prioritizing features to maximize business value and improve collaboration outcomes.
- **Delivered consulting engagements to technology teams**, enabling automation of operations through Power Apps and Power Automate integrated with SharePoint, resulting in higher efficiency and reduced manual workload.
- **Developed a stringent process** with compliance and audit requirements to safeguard confidential information and strengthen data governance.
- **Partnered with Audit and ISO teams to close compliance gaps**, driving initiatives that contributed to a **100% audit pass rate** and improved organizational risk posture.

### Earlier Roles (2011 – 2016)

- **Led successful migrations and platform upgrades** (MOSS 2007 → SharePoint 2010, SharePoint 2013 setups), ensuring seamless transitions, minimal downtime, and improved collaboration efficiency.
- **Designed and delivered scalable SharePoint solutions** (custom & OOTB), including InfoPath forms and workflows, which streamlined business processes and reduced manual effort for enterprise clients.
- **Acted as primary client liaison and offshore POC**, gathering requirements, managing deployments, and providing platform support that improved delivery timelines, adoption, and overall user satisfaction.
